CARE & MAINTENANCE TIPS

Liquids

(i.e. Coffee, sodas, milk, etc.) Blot up liquid spills as soon as possible using absorbent cloth or sponge. Dilute the spill with water and continue to blot up until dry.

Ink Stains

Spray affected area with hair spray. Blot area with clean soft sponge, then wipe area clean with warm damp cloth. To maintain leather and vinyl surfaces, apply **AUTO BOND SEALANT** Mink Oil Leather/Vinyl Protector as often as needed.

Automatic Car Washes

Brushless systems are preferred. Car Wash Systems using bristle or brushes may scratch painted surfaces.

Waxes and Cleaners

Your **AUTO BOND SEALANT** treated surface requires no additional waxing or polishing as some polishing or waxing may damage your **AUTO BOND SEALANT** treated surfaces.

AUTO BOND SEALANT FABRIC & CARPET PROTECTOR

AUTO BOND SEALANT Fabric & Carpet Protectors are specially formulated to coat the individual fibers of the Covered Vehicle's carpet and upholstery. This seals against stains from spills and surface dirt while allowing the fabric to breathe and retain its natural softness.

Vacuuming carpet and upholstery frequently to avoid soiling from surface buildup is required. This will also prolong the life of the fabric as dirt acts as an abrasive contributing to premature wear.

Although a spill may penetrate the fabric to some extent, it will be suspended in the tiny air spaces between the weave of the fibers. Liquid spills should be blotted up as soon as possible. Use a clean terry towel or other absorbent cloth, pressing firmly and repeatedly, changing to dry sections until all wetness is removed. If any discoloration remains, spray lightly with a non-foaming, water-based cleaner such as **AUTO BOND SEALANT** Fabric & Carpet Spot Remover. Continue to blot the area dry and then brush with a towel to blend with surrounding areas. For spills that have dried, spray the spot thoroughly until wet with cleaning solution described above and follow the same blotting procedure. If the spot is deep, dilute with water and blot completely. Let the area dry. If the spot reappears, repeat wetting and blotting procedure until all of the substance comes up. Commercial fabric cleaners and spotting agents recommended for such things as tar, gum, and grease should not hurt the finish.

AUTO BOND SEALANT MINK OIL FOR LEATHER

AUTO BOND SEALANT Mink Oil for Leather products preserves and protects non-fabric upholstery against the fading, staining and discoloration that can lead to cracking. This conditioner provides a durable, detergent resistant, glossy protectant for non-fabric upholstery which guards against the fading, drying and shrinking caused by temperature extremes and the ultraviolet rays of the sun.

Due to extreme climate conditions and driver/passenger usage and wear, **AUTO BOND SEALANT** recommends the use of the **AUTO BOND SEALANT** Mink Oil for Leather to preserve its protective qualities and maintain the showroom appearance of the Covered Vehicle. Application should be done every three months or as often as is needed to maintain surface appearance and protection. If necessary, use a mild solution of soap and water or saddle soap to remove dirt from the surface. Apply **AUTO BOND SEALANT** Mink Oil for Leather evenly with a soft cloth or spray directly on area to be treated. Allow product to sit for 10-15 minutes, then wipe off excess applying only light palm pressure. Buff area with a soft, clean, dry cloth.

Not for use on fabric or glass (as this may cause smearing). Wipe down leather and vinyl surfaces with a damp clean cloth to remove dust in between **AUTO BOND SEALANT** Mink Oil for Leather applications.
